

DC Mono Plex

RF detection system

The DC Mono Plex provides all-encompassing protection for those who want maximum performance and transparency in their stores. The scratch-resistance acrylic panel with multi-wire construction offers the most refined design for any retail décor.

The DC Mono Plex is a single-antenna system that operates on radio frequency (RF) 8,2 Mhz pulse technology. Its microprocessor-controlled electronics offer excellent detection on both sides of the antenna.

Although the DC Mono Plex is a single-antenna system, a multiple antenna set-up is possible.

Specifications

Detection:

Both sides of the antenna:

- 1.00 – 1.20 meter for hard tags (50Ø)
- 0.75 – 0.90 meter for 5x5 sticker tags
- 0.60 – 0.75 meter for 4x4 sticker tags

General information:

- Easy to install, it is a real plug & play system, no set up needed
- It is possible to synchronize unlimited number of systems (by wire)
- Possible automatic synchronization up to 7 systems (by mains)

Dimensions:

Antenna: 330 x 15 x 1612 mm. (w x d x h)

Base: 358 x 100 x 12 mm. (w x d x h)

Material:

Panel: Scratch resistance clear acrylic

Base: Stainless steel

Weight: 12,5 kg.
